PERSONAL STATEMENT

A dedicated and enthusiastic Computer Science student actively seeking a position to apply and further develop programming skills in a professional environment. Known for performing well under pressure and excelling in fast-paced settings, I am eager to contribute to team success, tackle challenges, and learn from experienced professionals.

EXPERIENCE

OJT/Intern
S.P. Madrid Law Firm & Associates | 7/2024 - 9/2024
- Gained hands-on experience in Wappler (low-code platform) by studying and practicing on the company's internal website.
- Conducted security testing and vulnerability assessments, reporting potential issues for review.

PROJECTS

CvSU - Alumni Affairs Booking & Tracer System (Thesis Project)
- Developed a full-stack web application using PHP and MySQL with database design, API development, and system integration.
- Collaborated with stakeholders to gather requirements and analyze data, optimizing features and workflows for efficiency.
- Enhanced functionality and resolved bugs to improve system stability and user experience.

Carwash Management System (Group Laboratory Project)
- Developed a desktop application using .NET Windows Forms and SQL Server to streamline carwash operations.
- Implemented features including real-time statistics dashboard, configurable service pricing with multi-size options, employee management, tools and equipment tracking, archive recovery, and database backup/restore for data security.

Library Managemeny System (Personal Project)
- Developed an ASP.NET Core MVC web application with book browsing, searching, borrowing, and availability tracking.
- Designed user and admin dashboards for borrowed books, due dates, verification, and system oversight

Personal Note App (Personal Project)
- Created an ASP.NET Core Razor Pages app with Identity authentication and SQL Server for secure CRUD operations.
- Enhanced usability with note favoriting and usage statistics to improve user engagement.
